PROFILE

A second year student of Computer Science at Asia Pacific University with problem-solving, and software development skills. Possess proficiency in Python, JAVA, C, R-script, ASM and MySQL. Keen to pursue a career in software engineering, algorithms, and system optimization.

EDUCATION

Bachelor's in Computer Science

Asia Pacific University

2023 – present

Kuala Lumpur,
Malaysia

Foundation in Engineering

Asia Pacific University

2022 – 2023

Kuala Lumpur,
Malaysia

PROFESSIONAL EXPERIENCE

Part Time Agent(Remote)

Shiny StarLTD

2022 – 2024

- Technical Support & Troubleshooting
- Customer Service & Student Application Oversight

Nampula,
Mozambique

PROJECTS

Hospital Management System: A C-Based Solution for Patient Care and Administrative Efficiency

Streamlining Appointments, EHR Access, and Inventory Management for General Hospital

Key Work:

- Built **doctor scheduler** (appointment management, EHR access)
 - Implemented **file I/O** for patient records and reports
 - Added **input validation** for dates, times, and user data
 - Assisted with **core functions** (login, file operations)
- Skills:** C programming, modular design, file handling, input validation

Procurement Order Tracking System (POTS): An Object Oriented Java-Based Solution

Automating Purchase Requisitions, Supplier Management, and Inventory Control with Object-Oriented Programming

Key Work:

- **Development:** Implemented portions of role-based dashboards (all 5 user roles) using **Swing GUI**, including login/auth flows and selective menu rendering
- **Backend Logic:** Coded sections of file I/O operations (**items.txt**, **orders.txt**) and input validation
- **OOP Implementation:** Applied encapsulation in User class, assisted with polymorphic menu behaviors

Airlines Reservation System (ARS) Using Python

Key Work:

- Built **admin dashboard** with login authentication
- Implemented **flight management**:
- Developed **search functions** for flights and in-flight menus
- Ensured **input validation** for dates/times (e.g., "HH:MM" format)

Asia Pacific Airport Concurrent Simulation (Java)

Role: Lead Developer

- Designed **thread-safe runway/gate management** using **synchronized** blocks
- Implemented **resource sharing** for single refueling truck with wait/notify
- Developed **emergency landing protocol** for fuel-critical scenarios
- Generated **runtime statistics** (wait times, passenger counts)

CERTIFICATES

- Red Hat System Administration I (RH124) 
- Java and Object-Oriented Programming - Basics to Advanced 

ORGANISATIONS/VOLUNTEERING

APU Boxing Club <i>Secretary</i> • Coordinated with the executive team to plan training sessions, workshops, and inter-club competitions, enhancing member engagement. • Assisted in budgeting and logistics for equipment purchases, tournaments, and guest coach sessions.	2023 – 2024 Kuala Lumpur, Malaysia
The Giving Bank(TGB) <i>Volunteer</i> • Organized and facilitated engaging activities (e.g., arts & crafts, educational games, storytelling) for children at local orphanages, fostering creativity and emotional well-being.	2022 – 2024 Kuala Lumpur, Malaysia
Cocurricular activities <i>Event Host / Master of Ceremonies (MC)</i> • Energized and engaged 30+ children with Down syndrome as the dynamic host of a campus event, leading inclusive games, performances, and interactive activities.	2024 Kuala Lumpur, Malaysia

SKILLS

Critical Thinking & Problem Solving	Communication
Negotiation Skills	Adaptability & Learning Agility
